# September

Happy September! We're getting into the cooler seasons and with it, comes the fun of decorating for the season. Your new manufactured home is a blank slate, and there is no better season than autumn to display your personality through creative decor.

Orange seems to be the most popular color of fall, but there are many more options for decorating, depending on your taste. Take a look:

Fall Decorating Ideas to Turn Your Home Into an Autumnal Oasis

## 3 Home Maintenance Tasks To Tackle in Fall

1. **Check walkways for cracks.** Before the grass and sidewalks get covered with snow, or it's too cold to venture outside, check walkways for cracks and loose paver material. Fixing them before slippery weather can prevent an accident.
2. **Clean and repair the siding.** After a long summer, siding can become dirty or mildewed. September is a great time to use a pressure washer to clean it up, and inspect for more serious problems.
3. **Make sure windows are sealed tight.** All double or triple pane windows should have a tight seal around their perimeter that separates the panes and traps inert gas between them. If you notice your windows are foggy, that can be a sign of a failed seal.
